ULTRX FIBER COLLECTION

The Next Evolution in Fiber Technology ULTRX is an advanced brush fiber designed to deliver exceptional coverage uniformity and consistent product payoff, all while maintaining an incredibly soft, silky feel on the skin. Created using highly technical extrusion and unique tipping processes, this revolutionary fiber features an exclusive infinity-shaped profile for unparalleled precision. Unlike traditional cylindrical fibers, ULTRX splits into two ultra-fine tips at the end, ensuring even

product pickup and distribution. The ultra-thin fiber tips evenly pick up powder and liquid makeup products, while the softly textured midsection grips product for a perfectly smooth application. Its feathery-soft texture provides a luxurious application experience, gentle enough for even the most sensitive skin. With consistent product distribution and superior control, this innovative fiber technology delivers precision, comfort, and performance in every stroke.

BALLERSTAEDT
SEALING SYSTEMS

Hall 20 – D32
GERMANY

Sustainability and recycling are key requirements when it comes to sealing containers. Our latest addition to the ECO family, the BaCo Sample Seal HSL-PP ECO 3.6, consists of an exceptionally thin aluminum layer, allowing for maximum resource efficiency while maintaining the same high quality. This material is highly resistant to a wide range of filling goods, making it suitable for numerous

packaging solutions. Additionally, it offers excellent printability, allowing for clear branding and product information to be displayed directly on the seal. This combination of sustainability, durability, and customization makes the BaCo Sample Seal HSL-PP ECO 3.6 an ideal choice for companies looking to reduce their environmental impact without compromising on performance.

MANGO SPLASH COOLING MASK

This mask spotlights a poured gel texture, which transforms into a drip-free liquid on application. Designed to be used after sun exposure, the formulation is infused with a natural moisturizing agent, to offer long-lasting hydration even after rinsing. Scented with mango, among the mask's ingredients are a tropical bioactive complex, composed of dragon fruit, mango, papaya, and pineapple to nourish the skin, while enhancing its barrier function and texture.

And sustainably sourced red algae-derived gelling agents provide the mask's jelly-like consistency, before it transforms into a liquid. The formulation soothes, cools, and calms redness, to calm skin after sun exposure or to hydrate. The formula is Sephora Clean, Credo Clean, vegan, and is composed of 98% natural origin ingredients, without EDTA, PEGs, oils, paraffin, ethoxylates, parabens, silicones, cyclic silicones, or phenoxyethanol.

APP586 LASH-UP

APP586 Lash-Up ergonomically tuned mascara brush has soft plastic bristles, organized around the inner body forming a curved shape: it allows the brush to follow the natural shape of the eye and lash curvature while positioning the product optimally from the lash line.

The bristles are arranged in an intertwined distribution position so that every single lash, with every possible length, is properly combed and volumized by the formula.

The concave inner part of the brush with short bristles acts as a reservoir for the formula, ideal for loading the lashes while giving them added density and curl. These shorter bristles can also be used on the lower lash line, for a neat and precise application.

Extra style and definition are achieved with the bristles at the top of the brush, ideal to touch up make-up on the corners of the eyes or add formula on the tip of the lashes.

Panoramic volume is achieved.

FACE CREAM WITH EXOSOMES

The exosomes of *Centella asiatica* in this cream are small nanometric vesicles containing proteins, lipids and genetic material. They have the capacity to modulate the cells microenvironment, regulate gene expression and induce cell differentiation, with beneficial effects on skin health.

Being composed of phospholipids, the main components of the epidermis, exosomes have a great affinity and penetration capacity. We used this technology to maximize the effectiveness of *Centella asiatica*. This formulation can be applied also as regenerating night mask.

ASEPTIBLEND

The ASEPTIBLEND series mixers are the ideal choice for pharmaceutical companies aiming to optimize quality, efficiency, and compliance with the most stringent hygiene regulations.

The mixing apparatus ensures homogeneous processing, even for the most complex formulations, reducing the risk of contamination and fully adhering to GMP standards.

It integrates mixing, dissolution, and thermal regulation functions and can also include turboemulsification/homogenization systems.

All surfaces, seals, and joints are aseptic.

This series features an innovative onboard cleaning and sanitation system.

Thanks to advanced process parameter control, including variable speed and real-time monitoring options, this mixer guarantees consistent and scalable results.

An indispensable solution for production lines striving for excellence and competitiveness in the global pharmaceutical market.

The 200ml Squeeze bottle with a 24/410 neck is the flacontube offered by Eurovetrocap, now improved both in terms of material and the range of accessories specifically designed for it. It resembles our classic Cilindro Alto Slim 200 bottle in terms of diameter and height, but stands out with a 45% reduced weight for a lower environmental impact, an innovative design, and a material that makes it easier to compress, ensuring excellent dispensing of the contents.

Made from an extremely soft material with excellent elasticity and memory, allowing the container to quickly regain its shape after each use. The base's geometry is carefully designed to guarantee the bottle's stability, while also making it ideal for squeezing from the bottom, just like a tube.

The new Flip-Top Slim cap, fits perfectly, making it practical and stable even when placed upside down, just like a classic tube.

MASCARA

The mascara consists of a bottle (material: PCR PP), cap (material: PCR PP), molded brush (material: LDPE virgin), threadpart (material: PCR PP) and wiper (material: LDPE virgin). It therefore consists of 100% polyolefin and over 90% PCR PP so theoretically 100% recyclable feasibility. For decoration we used Shadow printing on the bottle and laser decoration as text. With the shadow printing decoration process, the surface is partially modified with heat and

matt structures, line patterns and visual 3D effects can be created. This process already saves 26% CO2 emissions. Our new Rocktool decoration process which was used on the cap creates a haptic effect of the plastic through changes in the mold and can create a 3D effect. The design is incorporated directly into the mold. With all these decoration processes you can create a unique and unmistakable look for your mascara without additional color, varnish or foil.

GLOW UP

Glow Up was born to meet the needs of today's skin-first beauty trend, where makeup enhances rather than covers. In an era where lightweight, natural looks take center stage, this brush collection is designed to perfectly apply the latest hybrid products—innovative formulas that blend skincare and makeup for a seamless, second-skin effect. With textures that are lighter than ever—serums, tints, balms, and water-based foundations—application tools must evolve. Glow Up brushes are crafted to complement

these next-generation formulas, ensuring smooth, even application while preserving the skin's natural glow. They help achieve the fresh, radiant look that defines modern beauty: luminous, breathable, and authentically you. The Glow Up collection includes expertly designed brushes, must-have to enhance the application of modern hybrid makeup formulas. From a blending brush for effortlessly diffusing lightweight textures, to the pocket buffer that ensures seamless blending on the go.

HEINZ-GLAS

HEINZGLAS
family-owned since 1622

Hall 18 – D23
GERMANY

HEINZ-GLAS PRODUCT CARBON FOOTPRINT TOOL

The HEINZ-GLAS Group, a global producer of glass flacons and jars for the perfume and cosmetics industry, has decided to have the carbon footprint of its products voluntarily analysed and verified by an independent third party. HEINZ-GLAS relies on an intelligent IT tool developed in-house to systematically analyse emissions along the value chain of its products. TÜV SÜD has successfully validated the underlying methodology.

With the PCF tool, the CO₂ emissions of a HEINZ-GLAS product can already be variably determined during the development process. This enables customers to design the shape, form and decoration of the product in such a way that the lowest possible carbon footprint is achieved. In this way, Heinz-Glas is also documenting the transformation to electro-melting and renewable electricity at all global locations that began over 50 years ago.

OUR MELODY

Special Effect Powder redefines makeup through advanced Intercos technologies, revolutionizing blendability, vibrancy, and wear. More than a formula, it is a composition of innovation, silky glide, lasting adherence, striking intensity, smooth diffusion, and sustainable texture. Vertical lines, like delicate threads, are raised and subtly embedded, weaving through space to connect luminescence and matte. These textures engage in a captivating interplay as colors

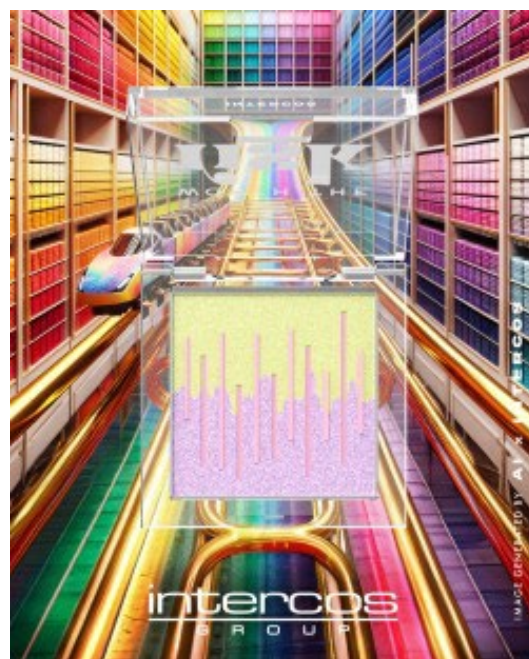

drift together, a gentle collision, a harmonious union evoking handcrafted artistry. This exquisite mix, both spontaneous and deliberate, sparks a dialogue of emotion and creativity, capturing raw, unfiltered beauty born from purposeful creation. Like a melody composed in real time, pigments settle in organic patterns, forming moments of exquisite unpredictability, revealing a radiant marriage of texture, finish, and color. This product embodies how technology fuels creativity and redefines cosmetic artistry. www.intercos.com

KERN PLUM SEED OIL

Kern Plum Seed Oil is an innovative, upcycled ingredient that transforms food industry by-products into a high-value cosmetic oil. It clearly stands out from other cosmetic oils with its intense nutty and marzipan-like odor, adding a distinctive sensory experience to formulations. Rich in unsaturated fatty acids and natural vitamin E (alpha- & gamma-tocopherols), it supports skin regeneration and is particularly suitable for dry skin.

Due to its low comedogenicity, it is also ideal for combination to oily, acne-prone skin. As a sustainable alternative to almond oil, it significantly reduces water consumption and CO₂ emissions, is bee-friendly, and requires no additional land use. Certified organic or NATRUE-approved, it meets the demands of conscious consumers while aligning with sustainability goals.

MEADOW KAPSUL™

The MEADOW KAPSUL™ revolutionises packaging by transforming aluminium beverage cans into versatile pre-fill containers. This solution addresses the pressing issue of waste generated by linear packaging. By modifying the can's end, we enable its use across diverse sectors, including personal care, beauty, home care, and beyond. The result is an affordable circular solution for brands that is already available at scale. Paired with a customisable reusable dispenser, it has proven

to deliver an exceptional experience for users. Easy to store, operate, and recycle. With the MEADOW KAPSUL™, consumers can implement sustainable practices in their routine without compromising on convenience. Additionally, the MEADOW KAPSUL™ reduces raw material consumption and lightens the can by eliminating the traditional pull tab. The result is a mess-free pre-fill experience for consumers, and flexibility for brands to tailor the technology to their specific targets and needs.

RELAXIN-GUM

At first glance a bizarre colored and scented jelly that magically transforms into a soft foam when in contact with water: Relaxin-Gum is an innovative soap with an unexpected consistency, designed to provide a fun and relaxing experience in the shower. Perfect to follow you during your travels or to be used daily, even just to put you in a good mood!

98% natural origin, it contains a Seaweed derived gelling agent and renewable plant

derived surfactant with a pleasing foaming action enhancing your shower experience. An anti-dehydration shield made up of a patented complex of natural sugars derivatives, helps dehydrated skin by acting on 3 key mechanisms of natural hydration resulting in smoother skin. Boosted with Alp Rose Leaf extract noted to increase skin stem cell vitality, boost epidermal regeneration, improve the skin barrier function and help the skin to cope with climate changes.

RELAXING AND SOOTHING FACE DROPS

An aromatic emulsion with a light and silky texture, it absorbs quickly, gently caressing the skin. A formulation designed in each of its components to provide comfort, reduce stress and awaken the senses through a sensory journey that soothes the skin and the mind. A unique combination of selected ingredients to transform each application into a unique moment to devote to oneself.

“Relaxing and soothing face drops” is a serum that is in the branch of ‘Skin Barrier Care,’ designed to meet two goals: to restore the barrier function of the skin, which is altered by high cortisol levels generated by negative moods, and to induce feelings of comfort and well-being, thanks to its sensory characteristics (texture, color, fragrance, packaging).

PLG-GRAPE

Innovation, Sustainability, and Anti-Aging Skincare

PLG-GRAPE is a bioactive ingredient for cosmetic and dermatological applications, developed by Macrofarm using molecular grafting between dextran and grape pomace extract. This Made in Italy innovation enhances stability, bioavailability, and controlled release, ensuring a biocompatible safe and effective formulation. Following circular economy principles, PLG-GRAPE upcycles Magliocco Calabrese grape pomace,

reducing waste and environmental impact. It offers a multi-level anti-aging action:

- Antioxidant protection from UV and pollutants, reducing oxidative stress.
- Collagen and elastin stimulation, improving skin firmness.
- Anti-inflammatory effects, delaying cellular senescence.
- Prolonged release, ensuring deep and long-lasting benefits.

By combining science and sustainability, PLG-GRAPE enhances local resources, promoting Calabria's excellence in a natural and effective skincare solution.

TRANSPARENT OVERWRAPPING PAPER CW38

There is a great demand for a sustainable alternative to plastic packaging in which the function of the packaging material is not lost, such as protecting against damage and first user guarantee. Sollas developed, together with the company one.five, a spectacular alternative for the standard PP wrapping material; an advanced durable, fully recyclable transparent paper.

With this wrapping material, delicate cosmetic products can be overwrapped with transparent paper in such a way that the consumer can see the wrapped product clearly. Starting from the standard heat sealing process, the sealable coating of the paper is water based and therefore optimal environmental friendly. The transparent paper can be used on all Sollas overwrappers (for older machines, minor adaptations might be required).

A BEEGAN COMPANY 

Hall 14 – D4-E3
LEBANON

FOREVER - DEODORANT POWDER

Beesline's Forever Portfolio leads the change with solutions combining effectiveness, beauty, pleasantness and sustainability. The Forever Roll-On exemplifies these benefits. To reduce material extraction, we opted for a reusable bottle made from 55% PCR. Additionally, the refillable concept has a lower climate impact as the powder formula consumes more than 84% less energy during manufacturing compared to liquid formulas while on the level of the pack,

the plastic bottle production is more energy-intensive than sachet production. Moreover, since sachets are smaller and lighter than bottles, they require 4.5 times fewer shipments upstream and twice fewer shipments downstream compared to bottles. On the level of waste reduction, by choosing the refillable roll-on bottle concept, each refill reduces plastic waste by 40.7 times. Refillable packaging offers increasing environmental benefits over time while inspiring consumer behavior change.

REGENERIS EMULGEL - CREMA PER CICATRICI

Regeneris Emulgel is an innovative scar care cream formulated to prevent keloid formation and reduce the appearance of scars, including those caused by acne. At its core is dimethicone, a powerful ingredient that creates a breathable protective barrier, sealing in moisture to promote healing and soften scar tissue. The formula also features escin, renowned for its anti-inflammatory and soothing properties, which help reduce redness and swelling around scars. Hyaluronic acid deeply hydrates and plumps

the skin, improving elasticity and texture. Centella asiatica extract supports natural skin regeneration and collagen production, helping to smooth and repair damaged areas. With its lightweight emulgel texture, Regeneris absorbs quickly without leaving a greasy residue, making it perfect for daily use. Whether addressing new or old scars, this advanced formula restores your skin's health and confidence over time, giving visible results with consistent application.

IAMARES

IAMARES
IL MARE DENTRO

Hall 14 – G34
ITALY

BEAUTY BOX

The benefits of water and the high concentration of its trace elements are many. This precious ingredient is able to perform an important purifying action with consequent improvement and maintenance of the skin barrier function, increased hydration and reduction of water loss. This is how the idea of developing aqueous cosmetic bases formulated entirely with sea water that contain at least 40% was born. This allows to obtain in the finished cosmetic a high percentage of trace elements for the skin.

Iamares products hydrate and tone the skin, improve circulation, have a biostimulating, purifying and soothing power. They promote the elimination of toxins, oxygenate and revitalize the skin thanks to an antioxidant action. Sea water is not presented as an active ingredient added in small quantities for the purpose of the emulsion, but becomes the key ingredient responsible for all the benefits that these cosmetics provide.

QUADTHERA V1

Quadthera's 4-level alternating ultrasound technology is capable of delivering the ultrasound from the outermost keratin layer to the deepest muscle layer, revitalizing skin cells and addressing multiple skin concerns in one device. Quadthera features a patented structure that enables the alternating output of four different frequencies, including the unique 1MHz frequency, which enhances hydration and the absorption of active ingredients, making it unmatched among LDM ultrasonic devices.

The first mode is hydration care mode, uses 1 and 3 MHz frequencies to restore moisture balance and enhances absorption of active ingredients. The second mode is Soothing care mode and it uses 3,10,17 MHz, calms troubled skin and reduces redness. The third mode is Elasticity and regeneration care mode, helps to promote skin regeneration and strengthen skin barrier. The last mode is total care that outputs 4 level alternating frequencies providing comprehensive care for overall skin health.

ESSENTIAL LINE

The Essential line by Skean® revolutionizes skincare with four essential and highly effective products designed to cleanse, hydrate, and protect the skin. The key innovation lies in the absence of added water, replaced by Cytofruit Waters®, an active recovery water derived from bergamot, rich in trace elements with toning effects superior to traditional demineralized waters.

This technology is combined with high-performance actives, including hyaluronic

acid, peptides, and ceramides, which stimulate collagen and elastin production for firmer, more elastic, and radiant skin.

Clinical tests show visible results from the very first applications, with a measurable increase in skin elasticity and the synthesis of new support fibers. Clean formulas, sensorial textures, and elegant packaging complete the Skean® beauty experience. A fusion of science, nature, and sustainability for healthy, glowing skin.

V-SERUM VULVAR SERUM

V- SERUM is a vulvar serum for the well-being and skincare of female intimacy, designed to improve the tissues of the vulva and combat discomfort. Developed on the scientific front, with oncological, antiseptic, aesthetic and gynecological research, with tests on women. It is the hidden desire of every woman, for the daily care of intimate parts and discomfort related to burning and bad odor. It's an excellent support in sexual sphere, because it counteracts vulvar atrophy during menopause.

BURNING AND INFLAMMATION - Grape pomace extract combined with 3 Hyaluronic Acids, improves inflammation from the first application
PERI AND POST MENOPAUSE - promotes thickening of vulvar tissue, thus increasing its vascularization and microcirculation, with improvement in terms of turgidity, elasticity, sensitivity.
ANTISEPTIC - helps counteract the proliferation of pathogens
INTIMATE SKINCARE - Improves elasticity, firmness and hydration.

COMPLEXION

CompleXion is a convenient, easy to use spectrophotometer facial scanner designed to simplify colour matching of cosmetics, in particular foundation makeup, to the customer skin tone. It accurately captures the true colour of the target in all lighting conditions, ensuring a perfect colour match from bright sunlight to indoor lighting. CompleXion offers an extensive, sophisticated functionality:

enabled by the spectrophotometer-grade accuracy the target colour can be formulated, not just matched with the existing library; the detected colour can be presented with its reflectance spectral chart; the device user can match with multiple colour libraries and create her/his own; the collected colour data can be organised by customer, date, etc.; All this makes CompleXion an essential tool for cosmetics retailers, beauty salons and makeup artists.

Rou:me

Routine for me

Hall 14EG - 14
KOREA

BALANCING CICA BLEMISH LINE

The Rou:me Balancing CICA Blemish line is specifically designed for sensitive skin, featuring high concentrations of Centella Asiatica extract combined with four natural ingredients fermented for seven days in jars and extracted using a low-temperature ultrasonic method. This line includes a bubble cleanser with gentle micro-foam for thorough cleansing, along with a toner, serum, and cream—all formulated to work together as a

complete skincare routine. In particular, the extraction method used for this line involves fermenting mate, borage, purple carrot, and molokhia in onggi—traditional Korean earthenware jars—for seven days, followed by low-temperature ultrasonic extraction. This process maximizes the generation of active compounds within the natural ingredients while minimizing their degradation during extraction, ensuring a stable and potent final product.

SKNS

By Kirk & Holm ApS

SKNS®

Hall 14EG – 9
DENMARK

SKNS HAND LOTION

SKNS Hand Lotion is packed with active ingredients, including postbiotics – a breakthrough in skincare. Postbiotics play a central role in promoting a healthy skin microbiome by occupying space that could otherwise be used by potentially harmful bacteria. The essential compounds in postbiotics stimulate the production of vital vitamins, amino acids, antioxidants, and anti-inflammatory substances directly on the skin. This means that many of the nutrients you would typically purchase multiple

products to obtain are already naturally present on the skin – and SKNS with postbiotics enhances them, leaving your skin well-nourished, protected, and balanced. The product features SKNS's signature scent: a fresh and mild fragrance. It's a luxurious hand lotion that maintains the skin's natural balance while leaving it silky smooth with a non-greasy feel. SKNS Hand Lotion is presented in a stylish and elegant glass bottle that is 100% recyclable, making it a perfect fit for any interior.

AGRADO SKIN POSITIVE

By Romar Global Care

AGRADO®
skin positive

Hall 36 – D18-E17
SPAIN

HYALURONIC HIDRA + GLOW

Hyaluronic Hydra Glow is a super-hydrating facial gel cream combining Hyaluronic Acid and natural micas for intense hydration and radiance. It serves as a hydrating primer suitable for all skin types and daily use. Featuring Hyaluronic 4D, it blends four types of hyaluronic acid to target different skin layers: Acid 1 targets the surface, forming a protective film to reduce water loss; Acid 2 targets the cuticle, retaining moisture; Acid 3 binds to the epidermis, providing double

hydration and repairing the barrier; Acid 4 penetrates the dermis, restoring the skin from within.

The natural micas add radiance and a silky texture, while the Glow Active Complex, inspired by freshwater algae, protects against blue light, oxidative stress, and Wi-Fi radiation. It also improves skin tone, firmness, and hydration, while reducing redness, sensitivity, and the appearance of crow's feet.

BELL HYPOALLERGENIC BIG BEST VOLUME MASCARA

This mascara not only thickens and highlights lashes spectacularly, but is also comfortable and friendly to your eyes. Carefully developed vegan formula and unique brush form a harmonious duo that will thicken and lengthen your lashes to the maximum, while providing extraordinary intensity of color. The product is easy to apply, doesn't leave marks on the eyelids, doesn't flake or crumble during the day.

The mascara contains natural olive and castor oils to nourish and moisture the hairs. "3/4 testers confirm that the mascara provides a spectacular false lash effect" – survey conducted on a group of 100 people selected from Pure Beauty Enthusiasts September 2024. Product suitable for vegans. PETA certified. Contains 94% ingredients of natural origin. Tested under the supervision of a dermatologist and ophthalmologist. Suitable for people with sensitive eyes and contact lens wearers.

HAIR ID

The perfect combination of microfiber and satin. Discover the ultimate solution for healthy and well-groomed hair with our innovative 2-in-1 hair turban. This unique hair turban offers two outstanding functions in one product to optimize your hair care routine. Gentle hair drying with microfiber: One side of the hair turban is made of high-quality microfiber fabric that efficiently absorbs moisture. This allows your hair to dry quickly and gently without straining it.

Microfibre is known for its gentle effect, which minimizes hair breakage and preserves the natural hair structure. Protection and anti-frizz with satin: Turn the hair turban inside out and enjoy the benefits of the other side, which is made of luxurious satin. Satin is ideal for reducing frizz and keeping hair smooth and shiny. The soft fabric protects your hair from friction and damage, which is especially beneficial when worn overnight.

PRINKER POP

Prinker POP is an interactive Kiosk that allows customers to create customizable makeup palettes using only colors they choose. When using Prinker Pop, customers have 3 options to design their own makeup palettes: try makeup simulation with a photo of themselves, try makeup simulation on an AI generated model or choosing colors directly.

Prinker Pop uses palettes made from recycled paper, pre-filled with skin-safe powder (matte and glitter). They act as a canvas onto which the device applies the desired makeup colors based on the customer's selection, using Prinker's proprietary cosmetic grade inks.

RUBIS SWITZERLAND

By Outils Rubis Sa

rubis[®]
SWITZERLAND

Hall 36 – D2-E1
SWITZERLAND

RED CASE WITH MIRROR AND SHINY TWEEZERS

Rubis classic shiny tweezers, steel or gold plated, are provided with an elegant genuine leather red case with mirror. A small but vital and perfect tool to be used every day at home or on a journey. These tweezers were developed to make daily eyebrow care easier and more enjoyable. Unwanted hairs are simply removed at the first go. The slanted tip nestles perfectly to the curve of your eyebrows.

The inner tweezers heel grips the hair over the entire surface and pulls it out with the entire root. This slows down the hair regrowth. These slanted tweezers easily grip even the finest hairs as well as the unpleasant initial stubble of regrowing hair. Perfect ergonomics allows superb handling of the tweezers. Swiss precision. Developed by a woman for women. Once Rubis, always Rubis.

BEAUHEIT

By Unique Products Aps

Hall 21 – Q2
DENMARK

BEAUHEIT COLLAGEN BOOSTER NO 113

With BEAUHEIT hyaluronic acid COLLAGEN BOOSTER the signs of age diminish, the skin looks rejuvenated, visibly firmer and recovers its elasticity. When we are young, skin's regenerative processes are more powerful than the destructive ones, resulting in youthful and glowing appearance. With ageing, this process tends to reverse, and wrinkles appear. To maintain the youthful appearance, it is equally important to reduce the destructive processes while stimulating

regenerative ones. Pea protein-peptide acts as a multifunctional anti-ageing active ingredient, rejuvenating the skin, boosting collagen, and rebalancing skin processes to recover skin youth appearance with the skin becoming visibly firmer and with more elasticity. Extract of circular apple pomace, an agricultural waste ingredient, is rich in polyphenols, and contributing to restoring the healthy appearance of the skin thanks to its action on reducing inflammatory processes.

CURADERMA - ACNE PRONE SKINCARE LINE

Curaderma by SALVEO is a holistic acne skincare line that merges botanical science with dermatology for gentle yet effective skin balance. Its five-step routine—Soap, Facial Toner, Serum, Cream, and Facial Oil—targets acne-prone skin with natural, active ingredients that cleanse, hydrate, and restore. Designed to purify, balance, and nourish acne-prone skin, Curaderma is free from synthetic preservatives and harsh chemicals, and is COSMOS Organic Certified.

Curaderma replaces water in its Toner, Serum, and Cream with Tea Tree and Green Tea Water, enhancing antibacterial and soothing effects. The line features Jojoba, Black Cumin, Moringa, and Neem Oils, along with Tea Tree, Thyme, and Lavender Essential Oils, Propolis Extract, and Hyaluronic Acid to regulate sebum, prevent breakouts, and hydrate the skin. Free from synthetic preservatives and harsh chemicals, Curaderma offers a clean beauty solution for clear, balanced skin.

Hall 21 – D1
ITALY

CREMA VISO HYDRALIFT ANTIPOLLUTION CON ACETO BALSAMICO DI MODENA IGP

Its light and silky texture provides a moisturizing, protective, anti-pollution and antiageing action. It contains the exclusive Leonardi's Balsamic Vinegar of Modena, aged for no less than 15 years in different wooden barrels, rich in phenols, with antioxidant, protective and dermo-purifying properties.

The formula is enriched with hyaluronic acid, moisturizer par excellence, and with active water of Damask rose buds and helichrysum for the soothing and firming effects. It also contains grape extract and vegetal glycerine, known to prevent the skin aging and dryness. Its fragrance releases pleasant citrus notes of tangerine and grapefruit.

WHITE CASTLE

By La Nordica Srl

Con Socio Unico

Hall 21 – B1
ITALY

LINEA PET

At WHITE CASTLE, our love for animals goes beyond avoiding animal testing. We are proud to be among the first in the industry to create a line of solid cleansers for the hygiene and well-being of our four-legged friends. The PET LINE includes three solid cleansers made with natural ingredients. Each product features a natural active ingredient derived from carbohydrate fermentation, along with shea butter, panthenol, rice starch, and organic extracts of calendula and chamomile.

These make the fur of dogs and cats soft and shiny, hydrate their skin, and strengthen the skin barrier. The line includes a shampoo that cleanses and protects, plus two shampoo-conditioners—one specially designed for puppies—that nourish, hydrate, and protect fur and skin. The PET LINE by WHITE CASTLE stands out for its gentle formulas, biodegradable ingredients, minimal water use in production, and eco-friendly, plastic-free cardboard packaging.

Natural oral care
Fresmy
that actually works

Hall 16 – D18
ESTONIA

PEACH TOOTHPASTE TABLETS FOR KIDS

Fresmy Peach Toothpaste Tablets for Kids 100% natural toothpaste tablets that actually work! Peachy perfection with a playful twist! Fresmy toothpaste tablets, infused with natural peach flavor, bring a touch of sweetness to brushing, making it perfect for kids and those young at heart. Gentle yet effective, these tablets support healthy teeth and gums while turning daily oral care into a fun, fruity experience. Our tablets are made of simple non-toxic ingredients.

We use hydroxyapatite that's a safer and effective alternative for fluoride (for strengthening and building up tooth enamel, and alleviating sensitivity). Tablets come in compostable bag instead of a plastic tube. 98% smaller carbon footprint compared to classical toothpaste (ClimateKIC). Just chew a tablet, brush with a (wet) toothbrush and spit the foam. Tip: do not rinse, so minerals stay in your mouth for the maximum effect.

RE BOOST COLLAGEN PRODUCT RANGE

Re-Boost Collagen Line – Goodbye, Zombie Cells! Designed specifically to restore and maintain skin's youthful appearance. This innovative approach goes beyond simply nourishing and hydrating the skin, focusing on slowing down the aging process by removing zombie cells — aged and damaged skin cells that can accelerate aging and reduce skin radiance. Scientifically Proven Youthfulness

Top-quality Senolytic Actives: Epilobium Fleischer and Althaea Rosea flower. These natural ingredients have undergone extensive lab testing to confirm their effectiveness in removing aged and damaged cells and stimulating skin rejuvenation. The test results show that regular use of these actives significantly reduces wrinkles, improves skin texture, and restores its youthful glow.

PERFECT DAY TINTING MOUSSE

The Perfect Day tinting mousse ensures an even complexion and a natural glow. It is available in two colour variants: No. 1 Sun-kissed and No. 2 Sun-loved. The mousse adapts to the skin tone, conceals redness and imperfections and conjures up a fresh look - as if kissed by the sun. Thanks to its airy consistency, it blends comfortably into the skin, leaving it looking clearer and moisturising it all day long. Antioxidants protect against free radicals, while a vitamin D booster in the form of meadow button extract makes the skin glow.

Active ingredients:

- Meadow knot extract: Vitamin D booster, evens out skin tone.
- White tea: Antioxidant against skin ageing.
- Inulin from chicory: Moisturises and leaves the skin feeling silky smooth.
- Olive extracts: Strengthens+regenerates skin
- Gum arabic: Smoothes, firms and retains moisture.

The tinting mousse fulfils the criteria of controlled natural cosmetics, is clinically tested and particularly well tolerated.

COLORFUL FOAM FOR WASHING AND PLAYING

Ready for a bath that turns ordinary washing into real fun? Bobini Fun Colorful Foam for washing and playing is a real hit! The pink or blue fluffy foam that appears when dispensed will make even the biggest opponent of washing hands and body unable to resist it. Who would have thought that a daily bath could be so... colorful?! This foam is not only a joyful adventure, but also cares for your baby's delicate skin.

The product not only cleans well, but also keeps the skin soft, smooth and well moisturized. We know that what excites kids the most can make adults shiver. Therefore, Bobini Fun foam for washing hands and body does not stain either the skin or the bathtub. Your child can play in the colorful foam and you can rest assured that everything will be clean. And this fruity scent! Pure magic!

KLAPP

SKIN CARE SCIENCE

Hall 16 – C23b
GERMANY

CELL PRO LIFTING CREAM

The LIFTING SERUM and CREAM support the formation of the skin's own collagen and thus firm the skin structure. The Anti-Glycation active protects the collagen fibers from saccharification (adhesion due to metabolism) and stimulates collagen synthesis. For a denser connective tissue and a firmer skin.

Apple stem cell extract protects the skin's own stem cells, promotes cell renewal and improves skin firmness. The serum has an immediate effect on expression lines. The anti-wrinkle active ingredient instant spilanthal has an immediate relaxing effect on expression lines, so that they are smoothed visibly and promptly.

CLEANSING FOAM CONCENTRATE

Cleansing Foam concentrate in a refill pack for mixing with tap water. With our concentrate, you can quickly and easily produce a mild cleansing foam by adding tap water and save approx. 92% on packaging! The consumer only needs to purchase the original product in the pump bottle once and can refill it repeatedly. Once the cleansing foam has been used up, the bottle must be emptied.

Then pour the concentrate from the sachet into the bottle and fill up with tap water. The mixture is briefly tossed and is ready for use. Because of its airy consistency, the foam is easier to spread on hands than traditional liquid soap. It is therefore very popular with children. Pump bottles are relatively expensive to purchase and also have a high material consumption. The refill can save a lot of resources. This makes sustainability fun and easy!

AVA

By Laboratorium

Kosmetyczne Ava

Hall 16-15
POLAND

EPIGENETIC LIFT

Epigenetics is the science about reversible mechanisms that can affect the expression of genes without altering the sequence in DNA. Epigenetic ingredients act as "switches" for mechanisms responsible for maintaining youthful skin (e.g., cell regeneration, collagen and elastin production) and "off switches" for processes of premature aging (e.g., the breakdown of hyaluronic acid or collagen). Specialists from AVA Cosmetic Laboratory,

utilizing the latest scientific findings, have developed a line of cosmetics that model the facial oval, sharpen features, and lift sagging cheeks.

The use of technologically advanced sea buckthorn seed extract in these cosmetics affects the inhibition of the Let-7b protein, which is responsible for accelerating the cell aging process. As a result, the skin becomes smoother, lifted, tightened, the facial contour is defined, and the cheeks are lifted.

BECONFIDENT NATURE HAP TOOTHPASTE

Beconfident Nature HaP Toothpaste use high performing natural ingredients to create a healthy oral micro biome, free from harm. Fluoride, gluten and alcohol free and common bad ingredients. Your mouth microbiome is complex with many diverse sets of microorganisms including bacteria, fungi and viruses. Your mouth microbiome is intrinsically connected to your health - both the elevation of your health or the regression towards disease.

A high amount of HaP (hydroxyapatite) replaces the usual fluoride in our toothpaste. HaP is the primary natural component in teeth and remineralizes and seals micro cracks in the enamel, safe for your body. The Beconfident premium Coconut oil pulling method halt plaque build up and with Xylitol coats the teeth in a luxuriously smooth layer that protects gum. Antioxidants like Cupuaçu, Vitamin C, Vitamin E and Hyaluronic acid add valuable healthy aspects.

MINOLEI

Hall 16 – C20d
SWEDEN

PRIMER, FOUNDATION AND POWDER

Our innovative trio—primer, foundation, and powder—work together to create The Uniset® Effect: base makeup that adheres exceptionally well to the skin while providing a natural finish. The word "Uniset" is a combination of "unifying" and "setting". Our formulas are designed to blend seamlessly as you apply them step by step. They connect and fuse together, creating a natural finish on all skin types while delivering an exceptionally long-lasting

result throughout the day. Thanks to its encapsulating properties, the base makeup protects itself from melting or sliding off during the day. This makes it especially effective in warm climates. Minolei is founded by Emma Filipsson and Helena Amiley, two makeup artists from Sweden. After 10 years in the beauty industry, we teamed up to create something entirely new! And after nearly three years of product development we launched our brand-new makeup line in August 2023.

SUNTRIBE

Suntribe®

Hall 16 – C20c
SWEDEN

NATURAL MINERAL DAY CREAM SPF 20

Made with 100% natural and organic ingredients, this premium, non-oily Mineral Day Cream with SPF 20 combines broad-spectrum UVA/UVB protection with skin-nourishing benefits. Formulated with Non-Nano Zinc Oxide and anti-aging Rosehip Seed Oil, it helps maintain your skin's youthfulness and vigour while protecting against visible blue light (HEV) from electronic devices.

Perfect for normal, sensitive, and dry skin, vegan, non-comedogenic. Use it on its own or as a base under make-up for all-day protection and healthy-looking skin. Choose the Tinted version to complement darker skin tones or serve as a foundation, or go for the Untinted option for paler complexions. Packaged in an eco-friendly sugarcane tube, it's free from perfume, preservatives, and synthetic chemicals. Gentle, effective, and allergen-free!

WAVELENGTH LED FACE MASK

The STYLPRO Wavelength LED Face Mask is a skincare device that uses red (633nm) and blue (415nm) LEDs to emit specific wavelengths of light onto the skin and near infrared (830nm) to promote skin health. Uncover a radiant and youthful complexion with the STYLPRO Wavelength LED Face Mask. This hands free, wearable device harnesses the power of LED lights, with 4 different modes, to target your skincare needs.

The red LED aids the stimulation of collagen production, helping to reduce the appearance of fine lines and wrinkles, while the blue LED helps target spots and blemishes promoting a clear complexion. Explore the benefits of near-infrared light to help reduce inflammation. The real magic happens with the fourth mode of the red, blue LEDs and near-infrared, working in harmony to address multiple skin concerns simultaneously, assuming no severe skin condition is present.

PURE ZERO EAU DE PARFUM & FRAGRANCE PRIMER

PURE ZERO is a fresh start, a statement of purity and the essence of beauty. PURE ZERO is a mindset, a reflection of personal expression that can be customized every day. Pure Zero is a game-changer Eau de Parfum and Fragrance Primer, designed to enhance, prolong, and elevate your scent experience. It increases longevity by slowing down the evaporation of fragrance molecules.

Projection is enhanced, making it more noticeable without being overpowering and allowing to layer multiple fragrances, helping them blend smoothly without clashing. Nevertheless, thanks to its molecular base, it can also be worn alone, creating a "your skin but better" scent, offering a light, personal fragrance without overpowering.

LUNYX

THE FUTURE OF HAIRSTYLINGDREAM WITHOUT BOUNDARIES, CREATE WITHOUT LIMITS LUNYX fuses the enigmatic essence of the Moon with the revolutionary power of YX, symbol of a new fluid dimension. In a universe without boundaries, LUNYX is more than a hairstyling head: it is a manifesto of creative freedom, a canvas without gender, ethnicity or time. YX is evolution. In genetics, X and Y distinguish male from female, but in LUNYX,

YX becomes a new code of fluid freedom.

As the Moon shapes tides and destinies, LUNYX illuminates new possibilities, guiding creators towards hairstyling without barriers. With LUNYX, art takes shape on a canvas without preconceptions. It is the essence of a fluid and cosmic freedom, the symbol of a future where creativity expands without limits, free and infinite.

N\O SCALP CARE

N\O Scalp Care is developed based on the principle that a healthy scalp is essential for healthy hair. The Scalp Care line consists of various nourishing products specifically designed to treat a sensitive scalp and restore balance. The shampoos and lotions are formulated to heal the scalp and strengthen weak and damaged hair. In recent years, there has been an increasing demand for solutions to scalp issues, partly due to the stressful lifestyles

many people lead today. Therefore, Scalp Care offers effective solutions that address these new challenges. Scalp Care offers a personalized, step-by-step system focused on treating thinning hair, hair loss, dandruff, and excessive sebum production. Scalp Care is 100% vegan and free from SLS, SLES, MI/MIT, parabens, and silicones. Additionally, all Scalp Care products are enriched with over 95% natural ingredients.

FILL

A new professional routine designed for deep hair restoration. Thanks to ActiveRelease technology, Fill repairs, strengthens and protects hair from future breakage, restoring shine and health to damaged hair. The line consists of four products, two of which are for professional use only, while the others are also designed for home use. Fill 1 Restructuring Shampoo gently cleanses thanks to vegetable keratin and rice and soya proteins, strengthening the hair and

preventing future damage.

Fill 2 Restructuring Mask, with a powerful combination of protein and ActiveRelease technology, rebuilds damaged strands, restoring a healthy appearance in minutes. Fill 3 Intense Moisturising Treatment, with acidic pH, closes the scales of the hair, keeping essential nutrients inside. Fill 4 Nourishing Leave-in, a mix of amino acids and moisturising substances, repairs and strengthens even the finest and most fragile hair.

ALERASIA

By GEFCON S.a.s. di Moccagatta G. & C.

Hall 30-E30
ITALY

ALERASIA HOME FRAGRANCES

Alerasia is the Monferrato brand that has made sustainability a founding value: its line of fragrances is born from the upcycling of wine bottles that, artistically worked, comes back to life as design candles and diffusers. Alerasia even proposes to give a third life to its products that, once the fragrance is exhausted, can become accessories for the table and for the home. The fragrances are also linked to the wines of the territory:

Alerasia is now expanding its offer with the new fragrance ""Pesca e Cortese"", which joins the now consolidated ""Red Grapes"" and ""Mulled Wine"". In the new fragrance, the sweet and fruity notes of peach marry the fresh and sparkling ones of Cortese in a carefree and festive harmony. A feeling of optimism and peace with the world, the promise of an opulent summer whose flower is blooming. • Top notes: grape, neroli, peach, orange; • Heart notes: pear, almond, apple; • Base notes: floral notes, acacia.

EXO + PRP TREAT ADVANCED THERAPY

ARKANA Advanced Therapy EXO + PRP Treat is an innovative product from the ARKANA Advanced Therapy line, created for advanced aesthetic cosmetology. With an innovative formula based on plant-based exosomes and PRP (Platelet-Rich Plasma), this treatment is a breakthrough in skin care, combining modern biotechnology technologies with natural regenerative processes. The result is an effective and long-lasting improvement in skin condition.

Exosomes, which are natural microparticles, penetrate deep into the skin to promote regeneration at the cellular level. PRP, widely used in aesthetic medicine, stimulates collagen production, leading to improved skin firmness and elasticity. The treatment is particularly renowned for its anti-aging and revitalizing properties. Results seen after the first session include immediate skin smoothing, accelerated regeneration, wrinkle reduction and reduced visibility of scars.

PREF-EXOSOME

Sterile and isotonic solution that combines 1.5% pure hyaluronic acid and exosomes derived from Lactobacillus cultures. This formulation is designed to hydrate, rejuvenate, and enhance the appearance of the skin by promoting cellular activity and improving resilience. The 1.5% hyaluronic acid attracts and retains moisture, providing deep hydration that plumps the skin and reduces the appearance of fine lines.

The exosomes, derived from Lactobacillus cultures, are rich in proteins, lipids, and signaling molecules that facilitate cellular repair and regeneration. These exosomes, which are 500 times smaller than human pores, deliver active ingredients directly to skin cells, boosting skin elasticity and promoting a healthier, more radiant complexion.

ULTIMATE BOTOGEN - BOOSTER ELISIR ANTI-AGE

The fight against wrinkles gains a new, sustainable ally: Botogen. This natural treatment uses plant phytocollagen, derived from upcycling agro-food waste, ensuring an eco-friendly approach. Unlike animal collagen, plant phytocollagen is more effective in hydrating and improving skin elasticity and tone, while promoting a sustainable production cycle. Ulva Lactuca, a macroalga certified by Cosmos,

ensures the use of biological active ingredients obtained through the highest sustainability practices. Rich in polysaccharides, it boosts collagen production and combats elastase, preserving skin elasticity. Argireline, a peptide with a 99.49% naturalness index, reduces wrinkles in just 7 days, mimicking the effects of Botox naturally. Botogen combines science and nature, offering an ethical and eco-friendly solution.

Black Mamba EVO represents Mantis latest innovation in the field of diode lasers, accurately designed to provide effective, fast and safe hair removal across all skin phototypes. Featuring a robust output of 2000 Watts and exceptionally brief pulse durations, this device is suitable to treat even the finest hair, ensuring outstanding results year-round. With its dual wavelength capability (808-1064 nm), it guarantees optimal performance at various depths, demonstrating safety

for darker skin phototypes. The handpiece, which is both powerful and light, presents a treatment area of 1 cm² for targeted regions, with the possibility to configure a 2 cm² spot to address larger areas. Its dynamic cooling system maintains consistent temperatures throughout each session, ensuring maximum comfort from the first to the last pulse on the skin. The new 17-inch Ultra HD touch screen enhances operator interaction, streamlining functions management for a more intuitive and efficient user experience.

PLENITUDE

Plenitude is a line designed for mature, thin skin lacking volume, seeking a solution to redensify the skin, redefine facial contours, and achieve a plumping effect. This innovative fusion of over 25 organic biotechnology actives and natural ingredients is created to add volume to tissues, fill, redensify, and reposition cheekbones, facial contours, and cheeks. Its formulas work on all three layers of the skin, deeply nourishing and hydrating the connective tissue. Plenitude offers unmatched

benefits for mature skin, providing volume, filling, redensifying, and reshaping facial contours.

General Features:

- Formulas composed of over 25 natural-origin actives.
- Includes 5 sustainable organic biotechnology actives.
- Works on all 3 layers of the skin.
- Unique textures.
- Exclusive synergistic aroma.
- Naturalness index >99%.

EXOSOMES & POLYNUCLEOTIDES REGEN

md:complexGenX Exosomes & Polynucleotides Regen formulation combines the cell-signalling power of exosomes, polynucleotides and growth factors with the firming and hydrating effect of hyaluronic acid, which all work together to stimulate tissue repair and encourage restoration and regeneration of the skin from within, boosting natural cellular repair, enhancing the skin's own repairing properties.

It works by signalling to cells to change their behaviour and start processes of regeneration, repair, and collagen production, preventing chronological ageing. It improves elasticity and hydration, calms inflammation and rebalances melanocyte activity to create an even and refreshed skin tone.

RHEA COSMETICS

By Dermosfera Srl

Hall 29 – A6-B5
ITALY

The_Zone is the new anti-aging line that allows for a 360-degree journey that begins with treatment at the institute and continues at home with specific homecare products.

Inspired by aesthetic medicine treatments, The_Zone takes a targeted approach on the three key areas of the face, keeping in mind that signs of aging vary from area to area. Thanks to this concept, manuals and homecare products are adapted to meet the needs of each area: forehead and eyelids

benefit from a Botox-like relaxing effect; cheekbones and lip contour from a filler-like effect; while jawline and neck receive an anti-gravity action inspired by collagen threads. With the TOTAL ZONE treatment, in just 80 minutes you get a relaxing, sensory experience with immediately visible results. To support the treatment at the institute, three homecare products - The_Lifter for forehead and eyelids, The_Plumper for cheekbones and lip contour, and The_Shaper for neck and jawline

FLAWLESS NIGHT CREAM

The ultimate sensorial icon. Prized for her potential and silky feeling with the highest concentration of illuminating and skin tightening cocktails to achieve and maintain optimal skin condition. The gem of the Flawless Line. To be used at nighttime, the skin looks smoother, brighter, firmer, and more lifted. Flawless Night Cream promotes hydrated skin that resists signs of aging and evolves in radiance day-by-day.

The cream's sumptuous formula provides a "cocktail" of ingredients that nourishes the skin with a 24-hour moisturizing effect.

The skin is visibly rejuvenated, with youthful density, smoothness and firmness, while preventing the appearance of wrinkles. The skin gets a new luminosity and uniformity for a face full of energy while it infuses an incredible elasticity. With continued use, it helps maintain a young and beautiful appearance of the skin.
